## Education

### University of Florida

B.S. in Sustainability and the Built Environment | B.A. in Statistics

Gainesville, FL

Aug. 2024 – May 2028

- Cumulative GPA: 3.6
- AI Certificate (in progress) | LEED Green Associate Accreditation (in progress)

## Research Experience

### Undergraduate Researcher

Aug. 2026 – Present

GETCOT Lab, Engineering School of Sustainable Infrastructure & Environment (ESSIE), UF

Gainesville, FL

- Analyze public EIA datasets using Python (pandas, matplotlib, seaborn) to clean data and visualize trends in U.S. energy consumption and data center electricity demand.
- Research how the escalation of AI impacts energy grid load and renewable energy integration.

### Student Climate Fellow

Apr. 2026 – Present

Florida Climate Institute

Gainesville, FL

- Investigate how housing type and tenure shape experiences with flooding and support for green stormwater infrastructure (GSI) using a nationwide dataset.
- Map GSI locations and flood-vulnerable areas using ArcGIS spatial analysis, GIS datasets, and Esri shapefiles
- Produce an ArcGIS StoryMap shared with the Gainesville Office of Resilience and Alachua Conservation Trust.
- Perform statistical analysis in R (sf, tidyverse, ggplot2, dplyr) including ANOVA and pairwise comparisons to compare flood experience across housing types.

### Undergraduate Research Assistant

Mar. 2026 – Present

PEN Lab, College of Design, Construction, and Planning, UF

Gainesville, FL

- Analyze, clean, and interpret iMotions eye-tracking data on perceptions of green stormwater infrastructure using R.
- Perform statistical tests (ANOVA, Kruskal-Wallis, pairwise comparisons) in R to determine significance across participant groups.
- Organize and clean Qualtrics survey participant data; manage participant compensation and communication.

## Work Experience

### Project Engineer Intern

May 2026 – Aug. 2026

Moss and Associates

Ft. Pierce, FL

- Managed construction operations for a large-scale 75-megawatt solar photovoltaic project including scheduling and logistics coordination.
- Organized delivery quantities, daily construction plans, and material tracking using Excel; edited spatial data and engineering drawing PDFs in Bluebeam.

## Technical Skills

**Programming & Analysis:** Python (pandas, matplotlib, seaborn), R (sf, tidyverse, ggplot2, dplyr), SQL, MATLAB

**Data Engineering:** ETL pipelines, SQLite, API integration (EIA), data cleaning and transformation

**Portfolio:** Solar energy ETL pipeline – [wploving2.github.io](https://wploving2.github.io)

**Geospatial:** ArcGIS (spatial analysis, layer mapping, StoryMaps), Esri shapefiles, Bluebeam

**Office & Visualization:** Microsoft Office (Excel, Word, PowerPoint), Power BI

**Languages:** English (native), Spanish (advanced verbal and written)

## Certifications & Awards

**Python Data Structures** – University of Michigan (Aug. 2026)

**SQL for Data Science** – University of California, Davis (Aug. 2026)

**Student Climate Fellowship Grant** – Florida Climate Institute (May 2026)

## Leadership & Service

### Co-Founder and Director of Research

Aug. 2025 – Present

The MedGap Awareness Project

Gainesville, FL

- Founded and lead research teams writing about health disparities across medical specialties and the social and cultural sustainability of health equity.

### Treasurer

Mar. 2026 – Present

Green Building Club, University of Florida

Gainesville, FL

- Manage club finances and promote LEED certification and green building strategies to UF students.
